**RE: Recommendation for Raine Building / Danny Ricketts**

To Whom It May Concern:

I am pleased to recommend Raine Building for General Contracting projects. I give my highest recommendation without reservation.

Raine recently completed a 5,300 square foot rebuild of an Ob/Gyn clinic as we have expanded our presence in Gilbert, AZ. They completed the project on time and with very few change orders needed. The few change orders improved the project and were nominal in cost.

Danny Ricketts was the Supervisor of the project. I give him my highest recommendation. Based on his years of experience with medical tenant improvements, he made several suggestions along the way which improved the overall project while avoiding or saving cost. You'll be fortunate to work with him. Likewise, I am confident that any Raine Supervisor will do quality work.

In my over 20 years of practice administration, I have been involved with about a dozen medical TI projects. My experience with Raine and Danny was as good as with any other contractor with whom I have worked.

I would be happy to answer any questions you may have about our experience with Raine Building and/or Danny Ricketts. Again, I give my strongest recommendation.
