To Whom It May Concern,

I am pleased to provide this letter of recommendation for Raine Building, who recently completed the build-out of one of our dental offices in Buckeye, Arizona.

From the very beginning of the project, the Raine Building team demonstrated exceptional professionalism, organization, and expertise. Dental construction requires precision, clear communication, and a strong understanding of the unique needs of a clinical environment. Raine Building exceeded my expectations in all of these areas, especially as I am managing multiple projects in multiple states.

Throughout the process, they were responsive, transparent, and proactive in addressing questions and keeping the project on schedule. The quality of their workmanship is outstanding, and the finished space reflects the care and pride they put into their work. I am pleased with the final result.

I would confidently recommend Raine Building to any dental professional or business owner seeking a reliable, knowledgeable, and highly capable construction partner. They delivered an excellent product and made the entire experience smooth and stress-free. If you have any questions, I would be happy to share more about my experience.

Sincerely,

**Jay Freyder | Project Manager**
